

LPM-150

1½" LP-Gas Flowmeter

Product Bulletin

Designed for bobtail tank trucks and high-flow dispensing applications, the LPM-150 offers the widest flow range (12 - 60 gpm) available in a 1½" positive displacement meter. The LPM-150 utilizes a durable, all-ductile-iron housing for reliability, durability and years of low-maintenance use. In addition, the flowmeter is self-contained with all required accessories including vapor eliminator, strainer and differential valve.

The LPM-150 can be ordered with registration calibrated in U.S. gallons or liters, and is completely compatible with Neptune® 1½" flowmeters; both in external dimensions and its internal parts.

Primary Features

At the heart of the model LPM-150 flowmeter is the superior Liqua-Tech measuring chamber. It features a hard-coated piston with special dense metal oxide finish and hardened steel bearing shaft, field proven in thousands of installations.

The LPM-150 can be equipped with Veeder-Root printing or non-printing registers, for established reliability and lowest operating torque. The meter is also available configured with gear plate, star-driver, or spindle only for adaptation to third-party electronic registration units. The exclusive Liqua-Tech register gear plate adapter offers Neptune style change gears for ease of calibration.

The Liqua-Tech Difference

For over 15 years, Liqua-Tech Corporation has been an internationally recognized leader in the design and manufacture of top-quality LP-gas and NH3 flow meters and replacement parts.

Liqua-Tech currently produces complete ¾", 1" and 2" meters and ¾" through 2" replacement parts. 100% inspection on all metering components ensures that every product manufactured by Liqua-Tech Corporation conforms to exact tolerances

Specifications

Rate of Flow: 12 to 60 gpm (45 to 227 lpm) maximum.

Working Pressure: 350 psi (24 bar) maximum (24.6 Kg/cm²).

Connections: 1½" FPT on inlet check valve and differential pressure valve. Vapor eliminator and differential valve are flanged to flowmeter for easy installation. Standard configuration has inlet at left and outlet to right.

Materials

Housings Ductile Iron
O-rings & seals Buna-N

Register: Veeder-Root model 789002 (printing) or model 788700 (non-printing), with special Liqua-Tech VRA-Series gear plate adapter.

Units of Measure: Calibration is in U.S. gallons or liters.

Register

Reset Capacity 9,999.9 gallons, 9,999.9 liters.

Totalizer Capacity 9,999,999.9 gallons, 99,999,999 liters.

Operating Temperature: -10° F to 125° F (-23° C to 52° C).

Shipping Weight:

Without register or gear plate ??? lbs. (?? kg.)

With gearplate and printing register ??? lbs. (?? Kg.)
